

We are looking for a new colleague to join our team of software engineers, filling the position of

Java Software Developer and Integrator

As our next Java Software Developer and Integrator, you are part of the future projects for our customers worldwide. You will be part of a team that delivers software solutions to manage the complete flow of goods & machines within an automated warehouse. The Warehouse Management System/ Material Flow System that you will develop will take you through the communication with hardware machines & robots to the highest level strategy and communication with ERP Systems.

You will start with a comprehensive training phase and an assisted familiarization period and then you will have the following responsibilities:

- Configuration and set up of new projects using existing framework
- Developing new custom project features to integrate them into the existing framework used for project implementation
- Creating design and implementation concepts
- Contributing to the improvement of already delivered projects
- Ensuring high-quality software in cooperation with Quality Assurance Engineers
- Creating & organizing test suites (from unit tests to system tests, functional tests to load/stability tests) to continuously ensure the delivery quality
- Onsite and remote integration and testing of the systems about to be delivered
- Ramp up support of startup projects

Skills and qualifications

- Completed technical education in the field of software development
- Solid knowledge Java
- Solid knowledge in Object Oriented Patterns, Multithreading, Performance
- Good SQL skills for relational databases
- Linux and shell scripts knowledge is a plus
- Fascination for new tasks and enthusiasm for the implementation of technically demanding features
- Good communication and interpersonal skills
- Good team player as part of a global distributed team
- Fluent in English. German and/or French are a plus
- Willing to travel abroad for a short limited period of time: 15-20% of the time.

Why working with Elysian Software?

Elysian Software is a Romanian software development company that provides software consultancy to clients spread over 4 continents and from over 10 different industries (logistics, automotive, access control, retail, manufacturing, pharmaceutical, etc.).

Our team of over 30 experts with more than 15 years of experience in the field is here for both early-stage companies and corporations. We are guided by our values and mission to become the most valued strategic and technology partner and to be tightly integrated into the client's in-house operations.

We are also a fun company. Yes, everybody says that. You'll have to meet us and see for yourself.

What we offer:

In addition to the company and support of some fine colleagues for both coffee and problems, we also offer:

- Competitive salary and performance bonus;
- Pleasant work environment with global exposure;
- Professional and personal growth: access to technical and vocational development courses;
- Private medical insurance;
- Central location with safe parking space for bikes, and a nice garden for coffee breaks;
- Work-life balance: sports activities subscription, working from home policy, schedule flexibility, team building, bookster subscription and fun team activities;
- Wide scope of action by integration of modern technologies (e.g.: image recognition, voice recognition, robotics, autonomous vehicles, mobile computing), together with well proved ones (e.g.: OOP, database, MQ, automation).

Curious enough? Want to meet with us? Send us your CV to raluca.truca@elysian-software.com.
By sending your CV, you automatically agree with the GDPR policy, and your contact details will be stored and used only for the duration of this recruitment process. If you would like us to keep your CV for future opportunities, please write so in the email with your application.
